Portfolio

Experience

Software Engineer Apr 2026 – Present | Assiut, Egypt (Hybrid)

Badr University in Assiut (BUA) – DevHub

- Architected and maintained scalable backend systems using ASP.NET Core and Clean Architecture across EdTech, e-commerce, and CRM/CMS platforms.
- Built secure assessment and RBAC systems, including anti-cheating and exam-gating workflows.
- Developed responsive web applications and dashboards using Angular, TypeScript, and modern state management.
- Managed production infrastructure with Linux, Docker, object storage, and automated CI/CD pipelines across staging and production environments.

Freelance Software Engineer Oct 2025 – Present

- **ClickIt:** Optimized a live PHP system by resolving 90+ critical security and performance vulnerabilities.
- **Activ:** Developed a scalable sports web platform from scratch using Node.js and Next.js.
- **Cocorra:** Engineered a high-performance RESTful API for a mobile application (NDA).
- **Digital Menu:** Built a dynamic digital platform to streamline restaurant ordering and management.

Summer Intern Jul 2025 – Aug 2025 | Remote

Commercial International Bank (CIB)

- Explored Generative AI, Machine Learning, and risk assessment frameworks (VUCA) applied within modern banking operations.

Skills

Programming Languages — C# | TypeScript | JavaScript | SQL

DevOps & Tools — Docker | Linux (VPS) | Reverse Proxies (Caddy) | GitHub Actions (CI/CD) | Git | Postman

Frontend — Angular (Signals, Standalone) | RxJS | Tailwind CSS | Bootstrap

Backend & Architecture — ASP.NET Core (Web API, MVC) | Entity Framework Core | Clean Architecture | CQRS (MediatR) | SignalR | RESTful APIs

Projects

Root2Route – B2B Commodity & Live Auction Platform Nov 2025 – Jun 2026

.NET 10 & Angular 21 Multi-Tenant Platform

- Architected a multi-tenant B2B trading engine using Clean Architecture & CQRS (MediatR) across 21 feature slices, enforcing data isolation via custom X-Organization-Id filters and granular RBAC.
- Engineered a real-time live auction engine with zero race conditions using Optimistic Concurrency Control (OCC) via atomic ExecuteUpdateAsync predicates, exponential-backoff retries, and sub-100ms SignalR broadcasts.

Sales & Installment Management System Oct 2025 – Dec 2025

.NET Core MVC Financial Engine & Ledger Amortization

- Architected an enterprise installment engine using 3-Tier Clean Architecture, Unit of Work, and Railway-Oriented Programming (Result<T>) to handle complex amortizations and financial period closings.
- Guaranteed ACID consistency and zero ledger desynchronization across concurrent payments via an atomic FIFO allocation waterfall, ROWVERSION concurrency tokens, and automated EF Core audit interceptors.

ICPC NATU Community Platform Aug 2025 – Oct 2025

.NET 8 Contest Operations & Automated Scoring System

- Built an N-tier competition platform in .NET 8 using a hybrid EF Core and Dapper data layer, utilizing SQL window functions (RANK() OVER) and in-memory batching for sub-second leaderboard ranking.
- Automated continuous contest ingestion via asynchronous .NET BackgroundServices, integrating Codeforces REST APIs (HMAC-SHA512) and Google Sheets API (OAuth2) with an idempotent points ledger.

Education

Bachelor's degree in Information Technology Oct 2022 – Jul 2026

New Assuit Technology University

- Overall Grade : Excellent(90.24%)
- Class Rank : 9
